Form Approved
OMB No. 0704-0188

Public reporting burden for this collection of information is estimated to average 1 hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing this collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to Department of Defense, Washington Headquarters Services, Directorate for Information Operations and Reports (0704-0188), 1215 Jefferson Davis Highway, Suite 1204, Arlington, VA 22202-4302. Respondents should be aware that notwithstanding any other provision of law, no person shall be subject to any penalty for failing to comply with a collection of information if it does not display a currently valid OMB control number. PLEASE DO NOT RETURN YOUR FORM TO THE ABOVE ADDRESS.

MEMORANDUM FOR PRS (In-House Publication)

FROM: PROI (STINFO)

29 May 2001

SUBJECT: Authorization for Release of Technical Information, Control Number: **AFRL-PR-ED-VG-2001-124**
Liu, C.T., "Investigating Cumulative Damage in a Highly Filled Polymeric Material (VuGraphs)"

2001 ASME Summer Meeting
(San Diego, CA, 27-29 June 01) (Deadline: 21 June 01)

(Statement A)

1. This request has been reviewed by the Foreign Disclosure Office for: a.) appropriateness of distribution statement, b.) military/national critical technology, c.) export controls or distribution restrictions, d.) appropriateness for release to a foreign nation, and e.) technical sensitivity and/or economic sensitivity.
Comments: _____

Signature _____ Date _____

2. This request has been reviewed by the Public Affairs Office for: a.) appropriateness for public release and/or b) possible higher headquarters review.
Comments: _____

Signature _____ Date _____

3. This request has been reviewed by the STINFO for: a.) changes if approved as amended, b.) appropriateness of references, if applicable; and c.) format and completion of meeting clearance form if required
Comments: _____

Signature _____ Date _____

4. This request has been reviewed by PR for: a.) technical accuracy, b.) appropriateness for audience, c.) appropriateness of distribution statement, d.) technical sensitivity and economic sensitivity, e.) military/national critical technology, and f.) data rights and patentability
Comments: _____

APPROVED/APPROVED AS AMENDED/DISAPPROVED

Technical Advisor
Space and Missile Propulsion Division

Investigating Cumulative Damage in a Highly Filled Polymeric Material

C. T. Liu
AFRL/PRSM
10 E. Saturn Blvd.
Edwards AFB CA 93524-7680

Objectives

- Investigate the Effects of Strain Rate and Cyclic Loading on Cumulative Damage in a Highly Filled Polymeric Material.
- Determine the Relationship between the NDE Damage Parameter and material Properties.

A1361.pdf

NO. 3178 P. 4/13

Specimen Geometry

APR. 21. 2003 6:27AM

Stress-Strain Curves as Functions of Strain Rate

Relative Change in Acoustic Attenuation Versus Strain

(constant strain rate loading)

Damage Parameters Versus Log Time at Different Strain Rates

Damage Parameters Versus Time at Different Strain Rates

Material Behavior is Initially Linear and Incompressible; Following Dewetting, Response is Nonlinear and Compressible

Relative Attenuation of Acoustic Energy Versus Volume Dilatation

(monotonic loading)

Cycle Stress-Strain Behavior and Relative Change in Acoustic Attenuation Under Cycle Loading Condition

CYCLIC STRESS-STRAIN CURVES

RELATIVE CHANGE IN ACOUSTIC ATTENUATION VERSUS
STRAIN

Ratio of Hysteresis Energy to Total Energy Versus Total Energy at Different Strain Rates

$$E_T, \text{ in - lb} \\ \text{in}^3$$

A1361.ppt

NO. 3178 P. 13/13

Conclusions

- Strain rate has a large effect on damage intensity.
- Strain rate has no significant effect on the critical damage intensity.
- A good correlation exists between the NDE damage parameter and the material property.
- The cyclic stress-strain curves exhibit the typical stress softening phenomena.
